BusinessITServices was formed to provide small companies the Information Technology (IT) solutions formerly affordable only to larger businesses. Our price structure makes committed technology services possible for the smallest of businesses.

Through our expertise, commitment, and experience, BusinessITServices will equip you with the necessary tools that will meet your current needs; while adapting to future growth.

We help small businesses make informed technology decisions by providing plain English business sensitive advice and technology support.

Take control of your frustrations with your computer systems, and stop paying too much to get the support your business deserves.

BusinessITServices will be your dedicated IT department. We will perform routine maintenance on your network and its workstations, and be available for technical assistance.

### Network & Computer Maintenance

- ◆ An on-site presence as your Information Technology department
- ◆ Routine maintenance performed on your computer systems paying particular attention to Spyware, Ad-ware, Anti virus protection, security, updates, patches and more.
- ◆ Includes a block of time to be used for technical assistance
- ◆ Select a pre-packaged service or tailor a package to fit your needs
- ◆ Technical advice to help your business make sound decisions

### Wholesale computer hardware & software

- ◆ Competitive prices on hardware & software
- ◆ Installation services

### Computer service and repair

Technology assessments, preventative maintenance and timely upgrades.

### Web Design

Available soon. Don't try to do business without a web presence. Quite often, potential customers make the initial connection online. A custom designed website will project the professional image that gets results.

### Web Hosting

A low cost web hosting plan to house, serve, and maintain files for your website.

### Company E-Mail

Everyone in your company can have their own "Name@YourCompanyName.com" email address for essential business communications.
